- nephjc** I'm @toates\_19 nephrologist in London. No COI except that PD is not my area. Do love a bit of diuretic though #nephjc  
Wed Jun 3 12:02:23 PDT 2015
- hswapnil** Swapnil Hiremath, Nephrologist, @uottawamed, Canada. Col: like you Tom, don't know much about PD anymore! #nephjc  
Wed Jun 3 12:02:26 PDT 2015
- drmattgb** Evening all - looking forward to this one. Matt GB renal SpR UK no COI #nephjc  
Wed Jun 3 12:03:10 PDT 2015
- nephjc** Sure there will be some others along in a minute...#nephjc  
Wed Jun 3 12:03:16 PDT 2015
- caioqualunque** Francesco Iannuzzella, nephrologist, Italy. PD fanatic. No COI. I am on call, so I will be in & out #nephjc  
Wed Jun 3 12:03:35 PDT 2015

- nephjc** 2 papers tonight; 1 retrospective obs study & 1 review, both looking at PD for UF in heart failure #nephjc  
Wed Jun 3 12:03:53 PDT 2015

Wed Jun 3 12:05:23 PDT 2015
- nephjc** 1st topic: what's Ur approach to diff congestive heart failure? (1) ultrafiltration, (2) look for excuse to HD (3) more diuretic? #nephjc  
Wed Jun 3 12:05:51 PDT 2015
- nephjc** Speaking personally I am a diuretic man #nephjc  
Wed Jun 3 12:06:05 PDT 2015
- hswapnil** @logiebear111 tag with #nephJC! Welcome Ian (wish your wife happy birthday from all of us at #NephJC  
Wed Jun 3 12:06:10 PDT 2015
- nephjc** Or put another way...what would make you UF (HD/CVVH) a pt with HF? @hswapnil #nephjc  
Wed Jun 3 12:07:20 PDT 2015
- hswapnil** T1: diuretics for me too. But key point is, how high do you go? what doses and combinations are you comfortable with? #nephjc  
Wed Jun 3 12:08:08 PDT 2015

- nephjc** RT @hswapnil: T1: diuretics for me too. But key point is, how high do you go? what doses and combinations are you comfortable with? #nephjc  
Wed Jun 3 12:08:24 PDT 2015
- paulphel** @NephJC yea, maximise diuretics. Extracorporeal UF data is not convincing in CHF #NephJC  
Wed Jun 3 12:08:36 PDT 2015
- logiebear111** @NephJC usually more diuretic so long as urea no too high. hold back UF for bad cases after that #nephjc  
Wed Jun 3 12:08:44 PDT 2015
- drmattgb** #nephjc Diuretics are your front line weapon and I often think people are too quick to label 'diuretic resistant'  
Wed Jun 3 12:08:52 PDT 2015
- nephjc** \@hswapnil and in addition; what Creatinine are you prepared to max out at? #nephjc  
Wed Jun 3 12:08:58 PDT 2015
- caioqualunque** Diuretics, diuretics and then again diuretics untill Furosemide+metolazone+acetazolamide #nephjc  
Wed Jun 3 12:08:59 PDT 2015
- hswapnil** Joel @kidney\_boy's recipe was Furosemide (?120 mg) bid + 10 metolazone + 100 mg spironolactone if memory serves me right... #nephjc  
Wed Jun 3 12:09:03 PDT 2015
- logiebear111** @hswapnil cheers! #nephjc

Wed Jun 3 12:09:29 PDT 2015
- nephjc** @hswapnil @kidney\_boy 120mg bd? That's a weak dose; I'm a 60mg/hr man #nephjc  
Wed Jun 3 12:09:44 PDT 2015
- nephjc** .@DrMattGB what would you call diuretic resistant? #nephjc  
Wed Jun 3 12:10:10 PDT 2015
- drmattgb** @caioqualunque Agree - and also no point maxing out on diuretics if not adequately salt and fluid restricting #nephjc  
Wed Jun 3 12:10:34 PDT 2015

- paulphel** In US I was frequently called by Cardiology with patient already on UF and creatinine rising. Can't allow that to happen here [#nephjc](#)  
Wed Jun 3 12:10:38 PDT 2015
- hswapnil** wow! I humbly bow down to your dosing! MT [@NephJC](#): 120mg bd? That's a weak dose; I'm a 60mg/hr man [#nephjc](#)  
Wed Jun 3 12:10:46 PDT 2015

Wed Jun 3 12:12:13 PDT 2015
- paulphel** Absolutely. Pertinent for this study...were they truly resistant? Mean dose 140mg per day furosemide [#nephjc](#) <https://t.co/6WFQttOp7e>  
Wed Jun 3 12:12:26 PDT 2015
- nephjc** [@caioqualunque](#) so a rise in creatinine not relevant? [#nephjc](#)  
Wed Jun 3 12:12:31 PDT 2015
- hswapnil** RT [@DrMattGB](#): [@caioqualunque](#) Agree - and also no point maxing out on diuretics if not adequately salt and fluid restricting [#nephjc](#)  
Wed Jun 3 12:12:34 PDT 2015
- drmattgb** [@NephJC](#) Inadequate/ineffective diuresis - not as common as people think (take away the salt!) [#nephjc](#)

@NephJC @hswapnil dependent on clinical response, urine output etc More interested in Urea than Cr to be honest. #nephjc

Wed Jun 3 12:13:46 PDT 2015

**nephjc**

So looking at the Bertoli paper: inclusion was based on previous UF requiring HF admissions? Shld we be UFing anyone for HF? #nephjc

Wise words, sounds like something Yoda would say ;) #NephJC <https://t.co/p4hzBuWTpJ>

Wed Jun 3 12:16:38 PDT 2015

**damianfog**

@NephJC Probably not as these patients do respond to oral diuretics unless hypoalbuminaemic where gut oedema may impair oral abs #nephjc

Wed Jun 3 12:16:52 PDT 2015

**nephjc**

GFR 21?! Shouldn't they just have tried a bit harder with drugs before PD? #nephjc  
Wed Jun 3 12:17:18 PDT 2015

**drmattgb**

@NephJC Often get in there first and say - 'if diuretics are working, expect Cr to rise' - stops recurrent phone calls! #nephjc  
Wed Jun 3 12:17:18 PDT 2015

**paulphel**

While I'm not convinced by extracorporeal UF I'd don't think we can presume its the same as PD. That said, this evidence is weak #nephjc  
Wed Jun 3 12:17:53 PDT 2015

**damianfog**

@DrMattGB @NephJC Agree. Often see patients who only respond to diuretics 'in hospital' & clearly have excesses of salt at home #nephjc
